Subject Summaries

Here is a summary of what we learned in each subject this week:

Math – We started measurement and data this week. It is so important that your child knows his/her math facts, please make sure your child is practicing his/her math facts at home.

Reading – We will be utilizing a new program this year called "Schoolwide" in reading this year. We continued to explore fiction and the elements of fiction!!! Please make sure your child is reading at least 20 minutes each night at home.

Writing – We started thinking about sensory details for our persuasive pieces this week.

Social Studies – We continued exploring how humans change the physical characteristics of a community.

Absent Work

Your child is responsible for making sure they have all the work they missed due to an absence. They are also responsible completing it and returning it in the required time.

Upcoming Events/Reminders

Mon. 10/8 – NO SCHOOL – Columbus Day

Each week, your child will be bringing home a Weekly Folder that will have any graded papers and important notes from the week. Most information will be posted on my site, the district site, or both. We are really trying to reduce the amount of paper being used. If you require a paper copy, please let me know. This will also be my way of communicating with you about your child's behavior for the week.

Star Student

Our Star Student this week is **Shawn!!!!** He has done a great job following expectations this week, I am so incredibly proud of you bud!!!
