Subject Summaries

Here is a summary of what we learned in each subject this week:

Math – We continued with multiplication and started division this week! It is so important that your child knows his/her math facts, please make sure your child is practicing his/her math facts at home.

Reading – We will be utilizing a new program this year called "Schoolwide" in reading this year. We started to discuss how we should be thinking, asking questions, while we are reading. Please make sure your child is reading at least 20 minutes each night at home.

Writing – We talked about circle maps and used one to describe ourselves as reader.

Social Studies – We started talking about the physical environment around us like landforms, natural hazards, natural resources, and climate.

Absent Work

Your child is responsible for making sure they have all the work they missed due to an absence. They are also responsible completing it and returning it in the required time.

Star Student

Our Star Student this week is **Sienna!!!!** She has done such a great job of staying on task and being a huge help to both me, and her classmates in the classroom. Keep it up girl!!!!

Upcoming Events/Reminders

Mon. Sept. 3 – No School – Labor Day
Fri. Sept. 7 – Early Release @ 1:30

Each week, your child will be bringing home a Weekly Folder that will have any graded papers and important notes from the week. Most information will be posted on my site, the district site, or both. We are really trying to reduce the amount of paper being used. If you require a paper copy, please let me know. This will also be my way of communicating with you about your child's behavior for the week.

In the future, I will not be sending my newsletters home on paper, only via email. Please let me know if you did not receive an email from me, or want me to send a paper copy.
